Innovative Technologies for Manufacturing Leather and Fur Products :
A Study Guide / A. Ostrovskaya, R. Shagivalieva, M. Suntsova;
The Ministry of Education and Science of the Russian Federation, Kazan
National Research Technological University. – Kazan : KNRTU Press,
2023. – 96 p.

ISBN 978-5-7882-3320-8

This study guide contains the characteristics of raw materials used in manufacturing leather and fur products and describes the techniques and methods of processing the same with inorganic substances, from preserving through tanning and dressing.

It is intended for students pursuing a bachelor's degree in Consumer Goods Industry Technology and majoring in the Innovative Technologies for Manufacturing Leather and Fur Products.

It was developed at the Department of Plasma Technology and Nanotechnology of High Molecular Weight Materials.

TABLE OF CONTENTS

INTRODUCTION	4
1. RAW MATERIALS FOR LEATHER AND FUR PRODUCTION	7
1.1. General Description of Hides and Skins	7
1.2. Primary Processes of Raw Materials	15
2. CLASSIFYING THE BASIC TYPES OF RAW HIDES AND FURS	22
2.1. Types of Raw Hides and Furs	22
2.2. Rawhide Defects	35
2.3. Selecting Raw Materials for Stocks	38
2.4. Defining the Concepts of Leather and Fur. Principally Classifying Leathers and Furs.....	40
3. PRIMARY PROCESSES AND OPERATIONS IN LEATHER AND FUR PRODUCTION	45
3.1. Basic Process Flow Parameters	46
3.2. Soaking of Raw Hides	47
3.3. Mechanical Fur-Processing Operations at Preparatory Stages	51
3.4. Degreasing	52
3.4.1. Degreasing Techniques	53
3.4.2. Degreasing Practices	55
3.5. Dehairing and Liming	56
3.6. Mechanical Rawhide - and Skin-Processing Operations	61
3.7. Re-Liming and Abating	63
3.8. Pickling	66
4. TANNAGE	68
4.2. Neutralizing	81
4.3. Retannage	83
CONCLUSION.....	92
