O-567 The Electromagnetic Interference in the Electrical Power Supply  
System. The long-term variance of the voltage specifications: study  
guide / Vladimir Ya. Olhovskiy, Tatyana V. Myateg, Olga S. Ata-  
manova. – Novosibirsk: NSTU Publishers, 2019. – 66 p.

ISBN 978-5-7782-3936-4

The introduced manual is aimed at theoretical and practical training of master students in “Power Engineering” discipline (13.04.02. – Electrical Power Industry and Electrical Engineering). One of the main tasks of the manual is to consolidate the theoretical material studied by the students in the first term of the Master Program. The manual also includes the issues of electromagnetic compatibility in electrical supply systems with the object under study – the interaction of the system “power supply network – consumer”. It allows a student to better understand the physical processes running not only during the interaction of consumer power supply systems and power networks but also during the processes of consumer’s interactions. The authors analyze the quality of consumer electrical power supply on the basis of the system operating conditions in accordance with STANDART 32144-2013.

## CONTENT

Introduction.....	4
1. Voltage Deviations .....	8
1.1. Main Definitions and Standards.....	8
1.2. Estimation of Voltage Deviations .....	9
1.3. Techniques of Voltage Deviation Decrease .....	10
1.4. The Influence of Voltage Deviations on Power Consumer Operation .....	10
2. Voltage Fluctuations .....	12
2.1. Main Definitions and Standards.....	12
2.2. The Ways of Voltage Fluctuations Decrease in the Power Supply Systems .....	17
3. Voltage Non-Sinusoidality.....	19
3.1. The Main Definitions and Standards.....	19
3.2. The Currents Non-Sinusoidal of Nonlinear Loads.....	22
3.3. Oscillograms of Some Non-linear Loads Currents .....	23
3.4. Consumer Damage due to High Harmonics.....	42
3.5. Rationing of High Harmonics .....	47
3.6. The Ways of Voltage High Harmonics Decreasing .....	49
4. Voltage Unbalance.....	51
4.1. The Main Definition and Norms .....	51
4.2. The Ways Voltage Unbalance Decreasing.....	57
5. Frequency Deviation.....	61
5.1. The Main Definition and Standards .....	61
