

WATER-CLOSETS.

A

HISTORICAL, MECHANICAL,

AND

SANITARY TREATISE.

BY

GLENN BROWN,

ARCHITECT. ASSOCIATE AMERICAN INSTITUTE OF ARCHITECTS.

NEW YORK:
THE INDUSTRIAL PUBLICATION COMPANY.

1884.

Copyright Secured, 1884, by John Phin.

P R E F A C E.

The principal part of this book is a republication of the series on WATER-CLOSETS which appeared in the *American Architect and Building News* during the year 1883.

The matter has been revised, and the section on tanks and supply-valves added.

All illustrations were engraved from drawings made by the author, in a uniform style, specially for this work.

In book form the author hopes that the matter contained in it may be of service to all (and I think there are many such) who desire information on this plumbing fixture either from a mechanical, historical, or *sanitary* standpoint. The information contained herein has been gleaned from all available sources.

GLENN BROWN.

607 Louisiana Avenue,
Washington, D. C., 1884.

CONTENTS.

SECTION I.—ANCIENT CLOSETS.

	PAGE
Introductory—Roman Closets—Pompeian—Middle Ages—From Fourteenth to Nineteenth Century. Figs. 1-33 - - -	7-27
