Plastics technology : учебное пособие. Ч. 1 / С.Ю. Софьина; М-во образ. и науки России, Казан. нац. исслед. технол. ун-т. – Казань : Изд-во КНИТУ, 2012. – 212 с.

ISBN 978-5-7882-1295-1

ISBN 978-5-7882-1296-8 (ч. 1)

Tutorial is conformed to a State education standard in the direction 240100 – “Chemical technology” and the program “Polymer science and technology”.

The tutorial describes plastics based on polymers obtained by polymerization, polycondensation and on chemically modified polymers (preparation of monomer, polymerization or polycondensation, properties, processing and applications).

The tutorial is designed for the masters studying the disciplines “Chemistry and physics of macromolecular compounds”, “General chemical technology of polymers”, “Plastics technology”.

Prepared by the Department of Plastics technology.

Учебное пособие соответствует Государственному образовательному стандарту по направлению 240100 – «Химическая технология» и программе «Наука о полимерах и технология».

В пособии описаны пластмассы на основе полимеров, получаемых путем полимеризации, поликонденсации, и химически модифицированные полимеры (подготовка мономера, полимеризация или поликонденсация, свойства, переработка и применение).

Предназначено для магистров, изучающих дисциплины «Химия и физика высокомолекулярных соединений», «Общая химическая технология полимеров», «Технология пластмасс».

Подготовлено на кафедре технологии пластических масс.

Печатается по решению редакционно-издательского совета Казанского национального исследовательского технологического университета

Contents

Preface	5
1 GENERAL PATTERNS OF POLYMERIZATION REACTIONS	6
1.1 Addition Polymerization	6
1.1.1 Ionic Polymerization	10
1.1.2 Ziegler-Natta and Metallocene Polymerization.....	14
2 PLASTICS BASED ON POLYMERS	
OBTAINED BY POLYMERIZATION	16
2.1 Polymers of Unsaturated Aliphatic Hydrocarbons	
and their Derivatives	16
2.1.1 Polyethylene	16
2.1.2 Polypropylene.....	40
2.1.3 Polyisobutylene	56
2.1.4 Copolymers Containing Ethylene.....	57
2.2 Polymers of Unsaturated Aromatic Hydrocarbons	60
2.2.1 Polystyrene	60
2.2.2 Styrene-acrylonitrile Copolymers	81
2.2.3 Miscellaneous Rubber-modified Styrene-acrylonitrile	
and Related Copolymers	82
2.2.4 Styrene-maleic Anhydride Copolymers	84
2.2.5 Butadiene-styrene Block Copolymers	86
2.3 Polymers of Halogenated Unsaturated Hydrocarbons	87
2.3.1 Poly(vinyl chloride).....	87
2.3.2 Crystalline PVC.....	112
2.3.3 Graft Polymers Based on PVC	112
2.3.4 Vinyl Chloride-Propylene Copolymers	113
2.3.5 Vinyl Chloride-N-cyclohexylmaleimide Copolymers.....	113
2.3.6 Vinylidene Chloride Polymers and Copolymers.....	113
2.3.7 Vinylidene Chloride-Acrylonitrile Copolymers.....	116
2.3.8 Polytetrafluoroethylene	117
2.3.9 Poly(vinylidene fluoride)	123
2.4 Polymers Derivatives of Acrylic and Methacrylic Acid	124
2.4.1 Poly(methyl methacrylate)	126
2.4.2 Methyl Methacrylate Polymers	
with Enhanced Impact Resistance and Softening Point	142
2.4.3 Acrylic Adhesives	144
2.4.4 Hydrophilic Polymers.....	145

2.4.5 Polyacrylonitrile	145
2.4.6 Polyacrylamide	146
2.5 Polymers of Complex and Simple Vinyl Ethers	147
2.5.1 Poly(vinyl acetate) and its Derivatives	147
2.5.2 Poly(vinyl ethers)	151
2.6 Polymers Based on Derivatives of Ethylene with Complex Substituents	152
2.6.1 Coumarone-Indene Resins	152
2.6.2 Poly(vinyl Carbazole).....	154
2.6.3 Poly(vinyl Pyrrolidone).....	156
2.7 Polyethers.....	158
2.7.1 Acetal Resins	160
2.7.2 Miscellaneous Aldehyde Polymers	172
2.7.3 Polyethers from Glycols and Alkylene Oxides	173
2.7.4 Oxetane Polymers.....	176
2.8 Polyurethanes and Polyisocyanurates	178
2.8.1 Fibres and Crystalline moulding Compounds	179
2.8.2 Rubbers.....	181
2.8.3 Flexible Foams	189
2.8.4 Rigid and Semi-rigid Foams.....	200
2.8.5 Coatings and Adhesives	205
2.8.6 Polyisocyanurates	206
2.8.7 Polycarbodi-imide Resins.....	208
2.8.8 Polyurethane-Acrylic Blends	209
2.8.9 Miscellaneous Isocyanate-based Materials	209
