

## СОДЕРЖАНИЕ

---

Том 59, № 2, 2025

---

Fleas (Siphonaptera) as vectors in natural plague foci worldwide: host-parasite relationships, faunistic and geographical analysis, epizootic significance 91

*Medvedev S. G., Verzhutsky D. B., Kotti B. K.*

Сезонная динамика зараженности язя *Leuciscus idus* метацеркариями трематод семейства Opisthorchidae и ее сопряженность с флуктуацией уровня воды 157

*Ядренкина Е. Н., Катохин А. В.*

Factors affecting the establishment of Dengue fever vectors: a graphical model 172

*Nasirian H.*
