A NEW, GREATLY IMPROVED, AND CHEAP EDITION,
OF THE
ENCYCLOPÆDIA BRITANNICA.

WITH PRELIMINARY DISSERTATIONS BY
SIR JAMES MACKINTOSH,
AND
PROFESSORS STEWART, PLAYFAIR & IESLIE.

*To be completed in 20 Vols. 4to. With a New
Set of Engravings on Steel.*

EDITED BY PROFESSOR NAPIER.

In this edition, the Supplement will be incorporated—every Article will be thoroughly revised, and what is antiquated or imperfect superseded by new and more complete Treatises. The Editor will be assisted by many additional Contributors of the highest celebrity in Science and Literature, at the same time that he will have the support of those eminent individuals by whose contributions the late Supplement attained so high a reputation. Among these may be enumerated Sir WALTER SCOTT, BARROW, JEFFREY, MALTHUS, SUMNER, IVORY, WALLACE, GREVILLE, WHATELY, &c.

The liberal encouragement bestowed on the New Edition of this National Work, has induced the Proprietors, at a great additional expense, to introduce an improvement which must greatly add to the value of the book, at the same time that the price to Subscribers will remain unaltered.

The Maps, which have hitherto been confined to a single 4to page, will in future extend over two pages, each Map forming a folio leaf, folded in the middle, and placed upon a guard. For this purpose, Drawings will be made from the most approved and recent authorities, and the Engravings will be executed on steel, in the best manner, by SYDNEY HALL.

Duplicates of the folio Maps, to supply the place of those that have appeared on the 4to scale, will be given in an early Part of the Work.

SYSTEM OF UNIVERSAL GEOGRAPHY.

BY M. MALTE-BRUN,

EDITOR OF THE "ANNALES DES VOYAGES," &c.

PARTS I. TO XV. PRICE 7s. 6d. EACH.

- VOL. I. contains Mathematical, Physical and Political Principles of Geography.
II. & III. Description of Asia and Oceanica.
IV. Of Africa and adjacent Islands.
V. Of America and adjacent Islands.
VI. Of Eastern Europe.
VII. Of Prussia, Germany, Switzerland and Italy.
VIII. Of Spain, Portugal, France, Great Britain, &c.

The work is now completed in the original; but in order to render it a more perfect System of Geography for the English reader, large additions will be made to the description of Great Britain, which will be published in a few months.

"We think the translators of M. Malte-Brun's Geography have done good service to the public, by rendering so valuable a work accessible to the English reader. If the part which is to treat of the United Kingdom be as well executed as that which treats of the United States of America, it will do something to supply one of the greatest desiderata in British Literature—a tolerable account of the British Dominions."—*Edinburgh Review*, No. 97.

"M. Malte-Brun is probably known to most of our readers as the author of a systematic work on Geography; he is, besides, the editor of a periodical digest under the title of '*Nouvelles Annales des Voyages de la Géographie et de l'Histoire*;' the first is as much superior to the compilations of our Guthries and Pinkertons, as the other is to the garbled productions of our Truslers and Mavors."—*Quarterly Review*, No. 52.

"Infinitely superior to any thing of its class which has ever appeared,"—*Literary Gazette*, No. 405.
