PREFACE.

IN this volume I have continued my Index to the Literature of the Spectroscope, Smithsonian Miscellaneous Collections No. 658 (published in 1888), to the end of the year 1900, after which date the International Committee for Indexing Scientific Literature begins the continuation of the work of cataloguing Spectroscopy. I have been obliged to leave Astronomical Spectroscopy incomplete, for want of space. In other respects I hope this second volume will be considered an improvement on the first.
