Astor Place, New York

CONTENTS

SEA AND LAND

	<small>PAGE</small>
How Energy Comes to and Acts upon the Earth's Surface.—The Work of Water on the Coasts.—Facts to be Noted on a Coast-Line.—Land constantly Wearing away and Sea-Floor Receiving Sediments.—Slight Effect of Sea on Rocky Shore.—Effect of Shore Currents.—Trap-Dykes.—The Great Yorkshire Wave-Terrace.—Sea-Caves.—Frost and Ice.—Organic Life.—Elevated and Submerged Beaches..	1

SEA-BEACHES

Various Divisions of Shore-Line.—Symmetry of Sea-Beaches.—Action of Surf.—Rate of Wear of Detritus.—Action of Coast Currents.—Sand Dunes.—Pocket-Beaches.—Action of Sea-Weeds.—Straight Beaches.—Continental Shelf.—Action of Tides and Waves.—Variations in Level of Shores.—Formation of Lagoons.—Marine Marshes: their Agricultural Value.—Endurance of Sand: Effect in Protecting the Continents.....	38
---	----

THE DEPTHS OF THE SEA

Modern Interest in the Deep Sea: Conditions of Inquiry.—Shape of Ocean-Floors: Absence of Mountains and Valleys.—Coral Reefs.—Continental Shelf.—Permanence of Continents.—Plants and Animals of the Sea.—Conditions of Marine Life: Absence of Seasonal Changes.—Marine Communities.—Abysmal Life.—Detrital Accumulations.—Fate of Sunken Ships.....	75
---	----

ICEBERGS

Effect of Expansion of Water in Freezing.—Classes of Ice-Fields.—Origin of Ice-Floes.—Migrations of Ice-Floes.—Origin of Icebergs.—The Greenland Glacier.—Annual Product of Icebergs; their Voyages; their Effect on the Ocean; the Order of their Movements; their Decay; their General Influence on Climate.—Transportation of Rock <i>Débris</i> by Icebergs.—Effect of Ice on Shores.—Iceberg Work in Former Geological Periods.—Dangers to Ships from Collision with Icebergs.....	115
---	-----

CONTENTS

HARBORS AND CIVILIZATION

	PAGE
First Condition of Ships.—Origin of Maritime Habit ; Relation of Habit to Form of Shore ; Effect on National Progress.—Condition of North America as regards Harbors.—Requirements of a Good Port.—Classification of Harbors.—Delta Harbors.—Valley Harbors : How Dependent on Changes of Level.—Fiord Harbors : The Conditions of their Formation ; Value as Ports.—Mountain Range Harbors.—Morainal Harbors.....	153

THE FORMATION AND PRESERVATION OF HARBORS

Lagoon Harbors ; their Origin and History.—Effect of Wind-blown Sands.—Sand-Spit Harbors.—Effect of Water-borne Sands.—Crater Harbors.—Coral-Reef Harbors ; Division into Two Classes ; Ways in which constructed.—Preservation and Destruction of Harbors ; Ways in which they Act ; Tidal Action ; Changes of Level ; Accumulation of Sediments ; Invasion of Marine Waste.—Relative Importance of Damaging Agencies in Lake and Sea Harbors.—Effect of Pocket-Beaches.....	187
---	-----

TIDAL CURRENTS AND ORGANIC LIFE IN HARBORS

Effects of Tides on Harbors : Organization of Tidal Streams ; Effect of Tidal Bars.—Action of Organic Life in Harbors ; Classes of Work done.—Effect of Marine Plants ; Flowering Species ; Sea-Weeds.—Growth of Marine Marshes : their Relation to Tidal Currents ; their Value for Tillage.—Tropical Marine Marshes.—Effect of Mangroves on these Areas.—Effects of Organic Life on Harbors : Work done by Mollusks ; by the Common Oyster ; Comparison of Northern and Southern Marine Marshes ; Work done by other Animal Species.—Synopsis.....	223
--	-----
