Первая российская электротехническая выставка на территории Соляного городка в Санкт-Петербурге была проведена в марте 1880 г. только что созданным VI (электротехническим) отделом Русского технического общества. На каждом стенде присутствовал специалист, рассказывающий посетителям о работе того или иного устройства. Назывались такие гиды «объяснителями», и на выставке ими были известные электротехники: П.Н. Яблочков, В.Н. Чиколев, Д.А. Лачинов и А.М. Бутлеров. На денежные средства, собранные от этой выставки, было организовано издание журнала «Электричество».

The first Russian electrotechnical exhibition on the territory of the Salt Town in St. Petersburg was held in March 1880 by the newly created VI (Electrotechnical) department of the Russian Technical Society. A specialist was present at each stand, telling visitors about the operation of a particular device. Such guides were called "explainers", and at the exhibition they were famous electrical engineers: P.N. Yablochkov, V.N. Chikolev, D.A. Lachinov and A.M. Butlerov. With the funds raised from this exhibition, the publication of the magazine "Electricity" was organized.
