## 158 years ago

In 1859 the first well 21 m deep was drilled in Pennsylvania state. It allowed to produce 15 barrels of oil daily.

## 153 years ago

In 1864 the well drilled in Krasnodar region was the first in Russia to start flowing.

## 141 years ago

In 1876 commercial production of oil was started in the USSR on the Cheleken peninsula on the territory of today's Turkmenistan.

## 112 years ago

In 1905 the first world's massive fire on oil mines occurred in Baku.

## 79 years ago

In 1938 oil fields in Kuwait and Saudi Arabia were discovered.

## 48 years ago

In 1969 the first major ecological disaster took place on an oil platform near the California coast.

## 44 years ago

In 1973 the first oil embargo was imposed.

## 3 years ago

In June 2014 Rosneft and ExxonMobil as part of Sakhalin-1 consortium commissioned Berkut platform on Arkutun-Dagi oilfield after topside successful installation on a gravity-based structure.

## 1 years ago

In October 2016 the US energy company Caelus Energy discovered a large oil deposit in Alaska. Oil reserves can reach 240 – 321 million tonnes.
