Arkhipov V.

Basics of classical mechanics and molecular physics : Teaching visual aid / V. Arkhipov; The Ministry of Education and Science of the Russian Federation, Kazan National Research Technological University. – Kazan : KNRTU Press, 2023. – 124 p.

ISBN 978-5-7882-3429-8

The teaching visual aid outlines the main issues of the General Physics course (sections Classical Mechanics and Molecular Physics). The presentation of material in the form of various information blocks – text, formulas, graphs – allows you to improve the quality of teaching, the level of understanding and mastering of the material by students.

The teaching visual aid is intended for students studying in the bachelor's degree program 18.03.01 “Chemical Technology” in all areas of preparation of mechanical and technological profiles in order to consolidate the theoretical foundations of the course “General Physics”.

It is prepared by the Department of Physics.

Content

Introduction	3
Mechanics	5
Kinematics	5
Dynamics	13
Momentum conservation law	21
Law of energy conservation	29
Dynamics of rotational motion of a rigid body	41
Oscillations and waves	55
Harmonic oscillations, pendulums.....	55
Addition of harmonic oscillations	63
Damped oscillations, forced oscillations, resonance	68
Waves	75
Molecular physics.....	84
Ideal gas.....	84
Real gas	91
Statistical distributions	94
Thermodynamics	102
Transport phenomena	114
Conclusion.....	120
Bibliography	121
