

## CONTENTS

<i>Sereda A.D., Kazakova A.S., Imatdinov A.R. et al.</i> Humoral and cell immune mechanisms under African swine fever (review)	709
<i>Fisinin V.I., Konopleva A.P.</i> About physiological and morphological processes in poultry at natural and induced molting	719
<i>Beloglazov D.V., Volkova N.A., Volkova L.A. et al.</i> Efficiency of local transgenesis of the oviductal cells in chicken as influenced by hormonal stimulation	729
<i>Kostyunina O.V., Kramarenko S.S., Svezhentseva N.A. et al.</i> The association of <i>IGF2</i> with productive traits of pigs of large white breed in the aspect of sexual differentiation	736
<i>Deniskova T.E., Dotsev A.V., Gladyr' E.A. et al.</i> Validation of the SNP panel for parentage assignment in local Russian sheep breeds	746
<i>Kharzinova V.R., Gladyr' E.A., Fedorov V.I. et al.</i> Development of multiplex microsatellite panel to assess the parentage verification in and differentiation degree of reindeer populations ( <i>Rangifer tarandus</i> )	756
<i>Glazko V.I., Kosovskii G.Yu., Koval'chuk S.N. et al.</i> Multi-locus genotyping of cattle genomes on the bases of the region homology to retrotransposons	766
<i>Fornara M.S., Kramarenko A.S., Svistunov S.V. et al.</i> Morphometric and molecular genetic differentiation of <i>Apis mellifera caucasica</i> L. honey bee lines reared in Sochi region	776
<i>Mima K.A., Burmakina G.S., Titov I.A. et al.</i> African swine fever virus glycoproteins p54 and CD2v in the context of immune response modulation: bioinformatic analysis of genetic variability and heterogeneity	785
<i>Imatdinov I.R., Balysheva V.I., Ponomarev V.N. et al.</i> Molecular and biological characteristics, and cultivation of an attenuated strain 1974-VNIIViM of Rift Valley fever virus	794
<i>Gerasimova N.N., Kolbasova O.L., Tsybanov S.Zh. et al.</i> Phylogenetic analysis of Russian EIAV isolates using an optimized nested PCR	803
<i>Artem'eva O.A., Pereselkova D.A., Vinogradova I.V. et al.</i> Screening of dairy cows' herd for presence in milk of hemolytic microorganisms in relation to somatic cell content	810
<i>Il'ina L.A., Yildirim E.A., Nikonov I.N. et al.</i> Taxons of chicken cecum microbiom are abundant, and influenced by the combined feed composition and decreased metabolizable energy	817
<i>Koval'chuk S.N., Kosovskii G.Yu., Arkhipov A.V. et al.</i> Development of real-time PCR assay for detection of <i>Anaplasma marginale</i>	825
<i>Yildirim E.A., Laptev G.Yu., Il'ina L.A. et al.</i> The investigation of endophytic microorganisms as a source for silage microbiocenosis formation using NGS-sequencing	832
<i>Mirzoev E.B., Kobyalko V.O., Polyakova I.V. et al.</i> Content of metallothioneins in the organs of sheep under chronic intake of lead with ration	839
<i>Chysyma R.B., Fedorov Yu.N., Makarova E.Yu. et al.</i> Humoral and cell factors of natural resistance in the animals of local breeds in specific environmental conditions of the Tyva Republic	847
<i>Shevchenko A.I., Shevchenko S.A.</i> Brief characteristic of blood morphology changes caused in broiler turkeys by dietary probiotics Vetom 1.1, Se-containing Sel-Plex and their combined application	853
<i>Zhuchenko A.A., Jr.</i> The priorities of academician A.A. Zhuchenko	859
