BORIS PATON — LAUREATE OF THE GLOBAL ENERGY PRIZE

The Global Energy Prize was instituted in 2002. The idea of introducing it was put forward by a group of known Russian scientists, supported by the largest energy companies, and approved by the President of Russia. It is one of the most prestigious prizes, which has been awarded annually since 2003 for outstanding scientific achievements in the field power engineering.

On the 18th of June, the President of Russia Dmitry Medvedev in St-Petersburg presented the Global Energy Prize to academicians Boris Paton and Alexander Leontyev. The ceremony took place within the framework of the Petersburg International Economic Forum.

Boris Paton received the honorary award for his «contribution in solving scientific and technological problems of pipeline transport of energy sources and machinery», and Russian scientist Alexander Leontyev — for «fundamental research in the intensification of processes of heat exchange at power installations».

Prof. Boris Paton was recognised to be the prominent research leader by Ukrainian, Russian and world scientists. Upon graduating from the Kiev Polytechnic Institute in 1941 in speciality of electrical engineer, he immediately started working in the defence industry, first at the «Krasnoe Sormovo» plant in Gorky (now Nizhny Novgorod), and then in Kiev at the Electric Welding Institute, which was evacuated to Nizhny Tagil to the Ural Car Building Plant (Uralvagonzavod).

Boris Paton is speaking at the awarding ceremony
