## CHAPTER III.

## THE SYMPTOMS OF HYPNOSIS ... .. 53

Division of psychical and physical symptoms—Definition of suggestibility—(1) **PHYSIOLOGY**: Voluntary muscular action—Suggestions—Fascination—Catalepsy by suggestion—Contractures, automatic movements—Ocular symptoms—Appearance of new reflex actions in hypnosis—Objective changes—Variations of the ordinary reflex movements—The organs of sense—Hallucinations of the senses—Negative hallucinations—Hyperæsthesia of the organs of sense—General sensations—Perception of pain—Mental condition—Involuntary muscular action—Pulse and Respiration—Suggestions—Secretion—Organic changes—Anatomical changes—Forel's experiments—(2) **PSYCHOLOGY**: Memory—Post-hypnotic memory—Suggestion during hypnosis and after hypnosis—Post-hypnotic suggestion—Estimation of time—Condition whilst carrying out the suggestion—Condition between awakening and carrying out the suggestion—Reasons given for the execution of the suggestion—Post-hypnotic suggestion without loss of memory—Activity of the intellect—Mechanical associations—Logical thinking in hypnosis—Rapid change of suggested ideas—Rapport—Consciousness and will—No loss of consciousness in hypnosis—Resistance to suggestions and successful control—Other expressions of the consciousness and will—Transitional forms of hypnosis—Training.

## CHAPTER IV.

## COGNATE STATES ... .. 192

Sleep—Dreams—Somnambulism—Mental derangements—Neuroses—Suggestions in the waking state—Hypnosis in animals—Fakirs.

## CHAPTER V.

## THE THEORY OF HYPNOTISM ... .. 218

General—Credulity—Appearance of expected results—Derangements of movement—Hallucinations—Rapport—Negative hallucinations—Memory—Post-hypnotic sugges-

tion—Actions performed without, and contrary to, will—Actions with loss of memory of the command—Automatic writing—Adherence to appointed time—Further analogies of post-hypnotic suggestion—Post-hypnotic hallucinations—Other psychological theories—Inhibition during hypnosis—Time of reaction—Physiological theories—Heidenhain's theory—Circulation of blood in the brain—Physiological speculation.

## CHAPTER VI.

## SIMULATION ... .. 273

General principles—Points of difference between the schools of Charcot and of Nancy—Main points in judging the question of simulation—Limits of trustworthiness of single symptoms—Psychical symptoms—Probable signs of simulation.

## CHAPTER VII.

## THE MEDICAL ASPECTS OF HYPNOTISM ... .. 290

Empirical therapeutics of suggestion—Suggestion the main point of hypnosis—Objections to suggestive therapeutics—Objections, and the opposing party—Ewald's objection—The dangers of hypnosis and their prevention—Further objections—Indications and contra-indications—Interpretation of results—Rules for suggestive therapeutics—Importance of suggestion—Importance of psychology to the physician—Utilization of hypnotism in surgery and obstetrics—Utilization of hypnotism in teaching and education—Importance of hypnotism for psychology.

## CHAPTER VIII.

## THE LEGAL ASPECTS OF HYPNOTISM ... .. 334

Historical—Crimes committed on hypnotized subjects—Crimes committed by hypnotized subjects—Importance of hypnosis in civil law—Retroactive hallucinations—Forensic utilization of hypnotism—Refusal of testimony or confessions—Loss of memory in the waking state of what has happened during hypnosis—Legal proposals.

## PREFACE

TO THE FIRST EDITION.

IN writing this book I was guided by the wish to offer to the reader a survey of all that is most important in the whole province of hypnotism. While in the numerous and detailed works on this subject which have lately appeared, sometimes its therapeutics and sometimes its forensic significance have been exclusively brought forward, I, for my part, have endeavoured to treat hypnotism broadly and from various points of view, avoiding irrelevant matter ; and, being aided by my own experiments, I was in a position to add much that was new to what was already known.

I here express my hearty thanks to Prof. August Forel, Director of the Cantonal Lunatic Asylum in Zürich, who placed several of his most valuable experiments at my disposal for this book ; also to Dr. Max Dessoir, of Berlin, who has assisted me both
