ALLEN'S NATURALIST'S LIBRARY.

The extraordinary favour which Jardine's Naturalist's Library has enjoyed during the last fifty years has induced the proprietors of the copyright to issue a series of volumes, written by some of the most eminent naturalists of the day, under the title of "Allen's Naturalist's Library."

The Publishers have secured for the Editorial work the services of Dr. R. BOWDLER SHARPE, of the British Museum, whose long and honourable connection with that Institution, coupled with his experience of the Editorship and publication of many of the most important of modern works on Natural Science, entitle him to be considered one of the fittest men in England for the task.

The Editor has obtained the co-operation of the following eminent naturalists:—

Mr. R. LYDEKKER, M.A. (Mammalia).
Mr. H. O. FORBES (Mammalia and Birds).
Mr. W. R. OGILVIE-GRANT (Birds).
Mr. W. F. KIRBY (Insects).

Professor R. H. TRAQUAIR, F.R.S. (Fishes), while the Editor undertakes several of the Ornithological volumes.

Over 1,000 steel-plate engravings, many of them by the most eminent artists of the time, will be utilised for the purposes of the present work, and will be produced in the highest style of modern chromolithography, in addition to which the services of Mr. KEULEMANS and other leading artists of the day have been secured for the illustration of those forms of animal life which it has been found necessary to depict, in order to bring the present work up to the standard of Modern Science.

The volumes are published at the popular price of 6s. Each volume containing about 320 pages of letterpress, together with from 20 to 40 coloured plates.

TENTATIVE SCHEME OF VOLUMES.

The following List will give an outline of the General Scheme, but it may be varied if, in the opinion of the Editor and Publishers, an alteration would improve the Series.

Works set in Clarendon are Now Ready.
