## PREFACE.

---

No writer of antiquity has taken a stronger hold upon the modern mind than Horace. The causes of this are manifold, but three may be especially noted: his broad human sympathies, his vigorous common-sense, and his consummate mastery of expression. The mind must be either singularly barren or singularly cold to which Horace does not speak. The scholar, the statesman, the soldier, the man of the world, the town-bred man, the lover of the country, the thoughtful and the careless, he who reads much, and he who reads little, all find in his pages more or less to amuse their fancy, to touch their feelings, to quicken their observation, to nerve their convictions, to put into happy phrase the deductions of their experience. His poetical sentiment is not pitched in too high a key for the unimaginative, but it is always so genuine that the most imaginative feel its charm. His wisdom is deeper than it seems, so simple, practical, and direct as it is in its application; and his moral teaching more spiritual and penetrating than is apparent on a superficial study. He does not fall into the common error
