Received 20.01.2015, received in revised form 14.03.2015, accepted 21.04.2015

This paper examines the current economic crisis in Nigeria and its impact on private medical business using Port Harcourt City as a case study. It took a brief look at the Nigerian economic crisis as well as the relationship between the economic crisis and health care delivery system. A brief survey of the economic activities of the study area is made so as to adequately situate the study and facilitate the understanding of the social, economic and political conditions that have given so much prominence to private practices in Port Harcourt. It also attempts to trace the origin of private health care delivery system in Nigeria in general and Port Harcourt in particular as well as discuss the impact it had made. Finally, it gave some suggestions on how to improve the health care delivery system.

Keywords: economic crisis, health care, medical business, private practices.

Research area: economics.

Introduction

The economic condition of any society is determined by the society's increasing ability to master its environment and subsequently its ability to effectively combine the human and natural resources for efficient production when this is effectively done, it is usually said that the economy of the society is stable. This is usually reflected in the standard of living of the people.

A crisis situation sets in when the human and natural resources are not effectively combined or when the proceeds from the combination are controlled by only a few. This situation is made

manifest in the society through unemployment, underemployment, hunger, poverty, diseases, poor housing, and rural-urban migration, poor medical services, low standard of education, bad roads, poor water supply, increasing number of destitute on the streets, scarcity of essential goods such as drugs and medicament, poor sanitation, social apathy, lack of the will and initiative to make changes for better and such likes (Igwe 1992, Tamuno 1998). In order to survive this crisis situation, the society devices mean of coping with it. In the health sector, which is the focus of this paper, economic crisis
