VOLUME III.

MESOZOIC ERA.

CHAPTER XII.

THE TRIASSIC PERIOD.

	<small>PAGE</small>
FORMATIONS AND PHYSICAL HISTORY.....	1
<i>The Triassic System (Newark Series) of the East.</i>	2
Distribution, 2. The rocks of the Newark series, 4. The conglomerates, 4. The sandstone and shale, 6. Conditions of origin, 7. Former extent, 9. Subdivisions, 10. Igneous rocks associated, 10. Structure, 11. Thickness, 17. Correlation, 17. Physiography of the Newark of New England and New Jersey, 19.	
<i>The Triassic in the West.</i>	24
The deposits of the western interior, 24. Thickness, 27.	
The Triassic system on the Pacific slope, 27.	
<i>Climatic Conditions.</i>	29
<i>Close of the Trias.</i>	29
<i>Foreign Triassic.</i>	30
Europe, 30. Germany, 31. England, 33. Sweden, and Russia, 34. Southern Europe, 35. Asia, 37. South America, 37. Africa and Australia, 38.	
THE LIFE OF THE TRIASSIC PERIOD.....	38
<i>The Plant Life.</i>	38
The dominance of the gymnosperms, 38.	
<i>The Land Animals.</i>	41
The rise of the dinosaurs, 43. The advanced differentiation of the chelonians, 43. The advent of the non-placental mammals, 44. The reptiles go down to sea, 45.	
<i>The Marine Life.</i>	48
The transition tracts, 48. The transition faunas, 49.	
General nature of the faunal change, 50. The earlier Triassic	

	PAGE
faunas, 52. The middle Triassic faunas, 54. The later Triassic faunas, 55. General nature of the fauna, 55. The cephalopods again in leadership, 56. Old and new gastropod types, 56. The transition and rise of the pelecypods, 56. The change in the type of brachiopods, 57. The echinoids become the leading echinoderms, 57. The corals, 57. Other forms, 57.	
CHAPTER XIII.	
THE JURASSIC PERIOD.	
FORMATION AND PHYSICAL HISTORY.....	59
The eastern part of the continent, 59. The western part of the continent, 61. The Lower and Middle Jurassic of the Pacific coast, 61. Lower and Middle Jura in the western interior, 63. The Upper Jurassic, 64. Surface distribution and position of beds, 67. Jurassic in Alaska, 67.	
<i>Close of the Jurassic, in America.....</i>	67
Orogenic movements, 67. Changes in geography, 69.	
<i>Foreign Jurassic.....</i>	70
Europe, 70. Lower Jura or Lias, 72. Middle Jura, 73. The Upper Jura, 74. Extra-European Jurassic, 77. Arctic lands, 77. Asia, 77. Africa, 77. Australia, 78. Central and South America, 78.	
<i>Coal.....</i>	78
<i>Geography of the Jurassic Period.....</i>	78
<i>Climate.....</i>	79
<i>Close of the Jurassic, in Europe.....</i>	79
THE JURASSIC LIFE.....	80
<i>The Marine Life.....</i>	80
Marine reptiles, 86. The American marine faunas, 90. The northern and more interior province, 92.	
<i>The Land Life.....</i>	94
I. <i>The Vegetation.....</i>	94
II. <i>The Land Animals.....</i>	95
Classificatory difficulties, 95. The Jura-Comanchean development of the land vertebrates, 97. The dominance of the dinosaurs, 97. Other reptilians, 100. The advent of aërial life; the pterosaurs, 101. The appearance of true birds, 102. The non-placental mammals, 103. The insects, 104.	

CONTENTS.

CHAPTER XIV.

THE COMANCHEAN (LOWER CRETACEOUS) PERIOD.

	PAGE
FORMATIONS AND PHYSICAL HISTORY.....	106
<i>Introductory</i>	106
<i>The Comanchean (Shastan, Lower Cretaceous) System</i>	108
The Atlantic and Gulf Border regions, 108. Constitution and structure of the Potomac and Tuscaloosa series, 112. Stratigraphic relations, 114. Thickness, 115. The Texas region, 115. Westward and northward extension, 117. In Mexico, 118. The Northern Interior, 119. The Pacific Border, 122. In the United States, 122. North of the United States, 123. Panama, 124.	
<i>The Close of the Comanchean (Lower Cretaceous) Period</i>	124
<i>The Lower Cretaceous in Other Continents</i>	125
In Europe, 128. Other continents, 129. Climate, 129.	
<i>Close of the Period</i>	130
THE LIFE OF THE COMANCHEAN PERIOD.....	130
The terrestrial vegetation, 130. The introduction of angiosperms, 130. The land animals, 133. The fresh-water fauna, 134. The marine faunas, 134.	

CHAPTER XV.

THE (LATER) CRETACEOUS PERIOD.

FORMATIONS AND PHYSICAL HISTORY.....	137
<i>The Atlantic Border Region</i>	137
Thickness, 140. Classification, 140. Changes in the beds since deposition, 140. The Gulf border region east of the Mississippi, 140. The western Gulf border region, 142.	
<i>The Western Interior</i>	144
The Dakota formation, 144. The Colorado series, 148. The origin of chalk, 149. The Montana series, 151. The Laramie series, 152. Transition beds between Mesozoic and Cenozoic, 154. Coal, 159. Thickness of the (Upper) Cretaceous system, 160.	
<i>The Pacific Coast</i>	160
<i>Climate</i>	161

CONTENTS.

	PAGE
<i>Close of the Period</i>	161
General movements, 162. Orogenic movements, 162.	
Faulting, 164. Igneous eruptions, 167.	
<i>Upper Cretaceous of Other Continents</i>	167
Europe, 167. Asia, 170. Africa, 171. South America, 171. Australia, 171.	
<i>Climate</i>	172
LIFE OF THE (UPPER) CRETACEOUS	172
<i>The Land Life</i>	172
The vegetation, 173. The land animals, 175. The dinosaurs, 176. Turtles, lizards, snakes, and crocodiles, 178. The pterosaurs, 179. The slight progress of the mammals, 179.	
<i>The Sea Life</i>	180
The sea saurians, 180. The sea serpents, 180. The sea turtles, 180. The sea birds, 182. The seaward movement, 185. The marine fishes, 185. The marine invertebrates, 186. Special faunas, 187.	

THE CENOZOIC ERA.

CHAPTER XVI.

THE EOCENE PERIOD.

INTRODUCTORY: BASIS OF CENOZOIC CLASSIFICATION	191
FORMATIONS AND PHYSICAL HISTORY OF EOCENE PERIOD	196
<i>The Eastern Coast</i>	198
The Atlantic coast, 198. The Gulf border, 199. Western Gulf region, 200.	
<i>The Pacific Coast</i>	200
Marine beds, 201. Brackish-water beds, 202. North of Washington, 203. Terrestrial formations, 204. Igneous activity, 212.	
<i>General Considerations</i>	212
<i>Close of the Eocene in North America</i>	214
<i>Foreign</i>	215
Europe, 215. Other continents, 219. General geography of the Eocene, 220. Close of the Eocene, 221.	
THE EOCENE LIFE	221
<i>The Transition from the Mesozoic to the New Era</i>	221
