PLANT  
BIOLOGY

## CONTENTS 1-2011

<b>Kornienko A.V., Apasov I.V., Butorina A.K. e.a.</b> Current state of foreign investigation on genetics and breeding of sugar beet	<b>3</b>
<b>Onishchuk O.P., Provorov N.A., Vorob'ev N.I. e.a.</b> Estimation of phenotypic presentations of bacterial genes, controlling the efficiency of nitrogen-fixing symbiosis with plants	<b>32</b>
<b>Chernov V.E., Pendinen G.I.</b> Comparative evaluation callusogenesis and regeneration in different barley varieties	<b>44</b>
<b>Deryabin A.N., Yur'eva N.O.</b> Formation and morphometric indices of potato microtubers in vitro at various formula of sugars in medium	<b>54</b>
<b>Chesnokov Yu.V., Bocharnikova N.I., Esaulova L.V.</b> Genotypical variability in progeny of transgenic interspecific hybrid of tomato. Communication I. Isolation of selective material	<b>60</b>
<b>Timina O.O., Ryabova A.S.</b> Feature of heterosis in <i>Capsicum annuum</i> L. in connection with degree of identity of key alleles of economic valuable determinants	<b>66</b>
<b>Ignatov A.N., Artemyeva A.M., Chesnokov Yu.V. e.a.</b> Resistance of <i>Brassica rapa</i> L. and <i>B. napus</i> L. to black rot and leaf spot pathogens	<b>85</b>
