THE LAST OF THE MOHICANS.

CHAPTER I.

Mine ear is open, and my heart prepared;
The world is worldly loss thou canst unfold: —
Say, is my kingdom lost? — *Shakspeare.*

IT was a feature peculiar to the colonial wars of North America, that the toils and dangers of the wilderness were to be encountered, before the adverse hosts could meet in murderous contact. A wide and, apparently, an impervious boundary of forests severed the possessions of the hostile provinces of France and England. The hardy colonist, and the trained European who fought at his side, frequently expended months in struggling against the rapids of the streams, or in effecting the rugged passes of the mountains, in quest of an opportunity to exhibit their courage in a more martial conflict. But, emulating the patience and self-denial of the practised native warriors, they learned to overcome every difficulty; and it would seem that, in time, there was no recess of the woods so dark, nor any secret place so lovely, that it might claim exemption from the inroads of those who had pledged their blood to satiate their vengeance, or to uphold the cold and selfish policy of the distant monarchs of Europe.

Perhaps no district throughout the wide extent of the intermediate frontiers can furnish a livelier picture of the cruelty and fierceness of the savage warfare of those periods, than the country which lies between the head waters of the Hudson and the adjacent lakes.

The facilities which nature had there offered to the march of the combatants, were too obvious to be neglected. The lengthened sheet of the Champlain stretched from the frontiers of Canada, deep within the borders of the neighbouring province of New-York, forming a natural passage across half the distance that the French were compelled to master in order to strike their enemies. Near its southern termination it received the contributions of another lake, whose waters were so limpid as to have been exclusively selected by the Jesuit missionaries to perform the typical purification of baptism, and to obtain for it the appropriate title of "Saint Sacrement." The

less zealous English thought they conferred a sufficient honour on its unsullied fountains, when they bestowed the name of their reigning prince, the second of the House of Hanover. The two united to rob the untutored possessors of its wooded scenery of their native right to perpetuate its original appellation of *Horican*.

Winding its way among countless islands, and imbedded in mountains, the "holy lake" extended a dozen leagues still farther to the south. With the high plain that there interposed itself to the further passage of the water, commenced a portage of as many miles, which conducted the adventurer to the banks of the Hudson, at a point where, with the usual obstructions of the rapids, or rifts, as they were then termed in the language of the country, the river became navigable to the tide.

While, in the pursuit of their daring plans of annoyance, the restless enterprise of the French even attempted the distant and difficult gorges of the Alleghany, it may easily be imagined that their proverbial acuteness would not overlook the natural advantages of the district we have just described. It became, emphatically, the bloody arena in which most of the battles for the mastery of the colonies were contested. Forts were erected at the different points that commanded the facilities of the route, and were taken and retaken, rased and rebuilt, as victory smiled or expediency dictated. While the husbandman shrank back from the dangerous passes, within the safer boundaries of the more ancient settlements, armies larger than those that had often disposed of the sceptres of the mother countries, were seen to bury themselves in these forests, whence they never re-issued but in skeleton bands, that were haggard with care, or dejected by defeat. Though the arts of peace were unknown to this fatal region, its forests were alive with men; its glades and glens rang with the sounds of martial music, and the echoes of its mountains threw back the laugh, or repeated the wanton cry of many a gallant and reckless youth, as he hurried by them, in the noontide of his spirits, to slumber in a long night of forgetfulness.

It was in this scene of strife and bloodshed that the incidents we shall attempt to relate occurred, during the third year of the war which England and France last waged for the possession of a country that, happily, neither was destined to retain.

The imbecility of her military leaders abroad, and the fatal want of energy in her councils at home, had lowered the character of Great Britain from the proud elevation on which it had been placed by the talents and enterprise of her former warriors and statesmen. No longer dreaded by her enemies, her servants were fast losing the salutary confidence of self-respect. In this mortifying abasement, the colonists, though innocent of her imbecility, and too humble to be the agents of her blunders, were but the natural participators. They had recently seen a chosen army, from that country which, reverencing as a mother, they had fondly believed invincible—an army led by a chief who had been selected from a crowd of trained

warriors for his rare military endowments, disgracefully routed by a handful of French and Indians, and only saved from annihilation by the coolness and spirit of a Virginian boy, whose riper fame has since diffused itself, with the steady influence of moral truth, to the uttermost confines of Christendom. A wide frontier had been laid naked by this unexpected disaster, and more substantial evils were preceded by a thousand fanciful and imaginary dangers. The alarmed colonists believed that the yells of the savages mingled with every fitful gust of wind that issued from the interminable forests of the west. The terrific character of their merciless enemies increased immeasurably the natural horrors of warfare. Numberless recent massacres were still vivid in their recollections; nor was there any ear in the provinces so deaf as not to have drunk in with avidity the narrative of some fearful tale of midnight murder, in which the natives of the forests were the principal and barbarous actors. As the credulous and excited traveller related the hazardous chances of the wilderness, the blood of the timid curdled with terror, and mothers cast anxious glances even at those children which slumbered within the security of the largest towns. In short, the magnifying influence of fear began to set at nought the calculations of reason, and render those who should have remembered their manhood, the slaves of the basest of passions. Even the most confident and the stoutest hearts began to think the issue of the contest was becoming doubtful; and that abject class was hourly increasing in numbers, who thought they foresaw all the possessions of the English crown in America subdued by their Christian foes, or laid waste by the inroads of their relentless allies.

When, therefore, intelligence was received at the fort which covered the southern termination of the portage between the Hudson and the lakes, that Montcalm had been seen moving up the Champlain with an army "numerous as the leaves on the trees," its truth was admitted with more of the craven reluctance of those who court the arts of peace, than with the stern joy that a warrior should feel, in finding an enemy within reach of his blow. The news had been brought towards the decline of a day in midsummer, by an Indian runner, that also bore an urgent request from Munro, who commanded the work on the shore of the "holy lake," for a speedy and powerful reinforcement. It has already been mentioned, that the distance between these two posts was less than five leagues. The rude path which originally formed their line of communication, had been widened for the passage of wagons, so that the distance which had been travelled by the son of the forest in two hours, might easily be effected by a detachment of troops, with their necessary baggage, between the rising and setting of a summer sun. The loyal servants of the British crown had given to one of these forest fastnesses the name of William-Henry, and to the other that of Fort Edward; calling each after a favourite prince of the reigning family. The veteran Scotchman just named held the first, with a regiment of regulars and a few provincials, a force
