First Edition 1902.
Reprinted 1903.

CONTENTS.

	PAGE
1. Evidence afforded by the outward facts of nature	1
2. Phenomena not hitherto explained	3
3. Theories of transmission of light	3
4. The granular structure of the universe	4
5. The degradations of light and normal waves	16
6. The permanence of the inequalities	17
7. Mobility of the medium	18
8. Singular surfaces are wave-surfaces	22
9. The molecules are individuals	23
10. Negative inequalities	23
11. The principal stresses in the medium	24
12. The cause of gravitation	24
13. Positive inequalities	39
14. The cause of light, and general conclusions . . .	42
