

103 MEMOIRS

OF THE
LIFE, WRITINGS, AND DISCOVERIES

OF
SIR ISAAC NEWTON.

BY

SIR DAVID BREWSTER, K.H.,

A.M., D.C.L., F.R.S., VICE-PRES. R.S., EDINBURGH, AND M.R.I.A.,
ONE OF THE EIGHT ASSOCIATES OF THE IMPERIAL INSTITUTE OF FRANCE—HONORARY OR CORRESPONDING
MEMBER OF THE ACADEMIES OF ST. PETERSBURGH, VIENNA, BERLIN, COPENHAGEN, STOCKHOLM,
MUNICH, GÖTTINGEN, BRUSSELS, HAERLEM, ERLANGEN, CANTON DE VAUD, MODENA,
WASHINGTON, NEW YORK, BOSTON, QUEBEC, CAPE TOWN, ETC., ETC.—
CHEVALIER OF THE PRUSSIAN ORDER OF MERIT OF FREDERICK
THE GREAT, AND PRINCIPAL OF THE UNITED COLLEGES OF
ST. SALVATOR AND ST. LEONARD'S, ST. ANDREWS.

*Ergo vivida vis animi pervicit, et extra
Processit longe flammantia moenia mundi;
Atque omne immensum peragravit mente animoque.*
LUCRETIVS, Lib. i. l. 73.

VOL. II.

EDINBURGH: THOMAS CONSTABLE AND CO.

HAMILTON, ADAMS, AND CO., LONDON.

MDCCCLV.

EDINBURGH : T. CONSTABLE, PRINTER TO HER MAJESTY.

CONTENTS OF VOLUME II.

CHAPTER XIV.

	PAGE
History of the Infinitesimal Calculus—Archimedes—Pappus—Napier—Edward Wright—Kepler's Treatise on Stereometry—Cavalieri's Geometria Indivisibilium—Roberval—Torricelli—Fermat—Wallis's Arithmetica Infinitorum—Hudde—Gregory—Slusius—Newton's Discovery of Fluxions in 1655—General Account of the Method, and of its Applications—His Analysis per Equationes, &c.—His Discoveries communicated to English and Foreign Mathematicians—The Method of Fluxions and Quadratures—Account of his other Mathematical writings—He solves the Problems proposed by Bernoulli and Leibnitz—Leibnitz visits London, and corresponds with the English Mathematicians, and with Newton through Oldenburg—He discovers the Differential Calculus, and communicates it to Newton—Notice of Oldenburg—Celebrated Scholium respecting Fluxions in the Principia—Account of the changes upon it—Leibnitz's Manuscripts in Hanover,	1-35

CHAPTER XV.

Nicolas Facio de Duillier attacks Leibnitz—Leibnitz appeals to Newton—He reviews Newton's "Quadrature of Curves," and accuses him of **Plagiarism**—Newton's opinion of the Review—Dr. Keill defends Newton as the **true inventor of Fluxions**, and apparently retorts the charge of **Plagiarism on Leibnitz**, who complains to the Royal Society—Keill explains his defence—The Royal Society approves of his explanation—Leibnitz calls Keill an upstart, and begs the Royal Society to silence him—the Society appoints a Committee to inquire into the Claims of Leibnitz and Newton—The Committee report to the Society, who publish the result in the "**Commercium Epistolicum**"—Instigated by Leibnitz, John Bernoulli attacks the Report, and asserts, in a private Letter to Leibnitz, that he was the first inventor of the new Calculus—Leibnitz circulates this Letter in a *Charta Volans*, and gives up Bernoulli as the author of it—Keill replies to this Letter, and attacks Bernoulli as its author, who solemnly

	PAGE
denies it to Newton—Leibnitz attacks Newton in a Letter to the Abbé Conti—Newton replies to it—The Controversy excites great interest—Leibnitz urges Bernoulli to make a public declaration in his favour—Bernoulli sends to Leibnitz the celebrated Letter “Pro Eminente Mathematico,” on condition of his name being kept secret—Leibnitz and Wolf alter this Letter improperly, and publish it in such a form that Bernoulli is proved to be its author—Bernoulli is annoyed by the discovery, and endeavours, by improper means, to evade the truth—The Abbé Varignon reconciles Newton and Bernoulli—Death of Leibnitz—Newton writes a History of the Calculus—General view of the Controversy, and of the conduct of the parties,	36–83

CHAPTER XVI.

Newton declines taking Orders—His Rooms in Trinity College—John Wickins his chamber-fellow—Letter from Mr. Nicolas Wickins, his Son—Dr. Humphrey Newton his Amanuensis from 1684–1689—His two Letters to Conduitt—Newton’s Speculations on the Theory of the Earth—James II. attacks the rights of the Charter-House, and sends an illegal Mandamus to the University of Cambridge—Newton one of the Delegates to resist this encroachment on its privileges—the Vice-Chancellor deposed—the object of the Deputation gained—Neglect of the Scottish Universities—Newton elected Member for Cambridge to the Convention Parliament—His habits of business—His letters to Dr. Covel—His acquaintance with Locke—His Theological inquiries—Locke exerts himself to procure for him some permanent appointment in King’s College, the Charter-House, and the Mint—Failure of that attempt—Newton’s disappointment—Ingratitude of his Country—Death of his Mother at Stamford—Writes an Account of Fluxions and Fluents for Wallis—His letter to Locke on multiplying Gold—Boyle’s Recipes and Belief in Alchemy,	84–122
---	--------

CHAPTER XVII.

Newton’s health impaired—The Boyle Lectures by Bentley, who requests Newton’s assistance—Newton’s first Letter to Bentley on the Formation of the Sun and Planets—His second Letter—Rotation of the Planets the result of Divine power—His third Letter—Hypothesis of Matter evenly diffused—Letter of Bentley to Newton—Reply to it by Newton in a fourth Letter—Opinion of Plato examined—Supposed mental Illness of Newton ascribed to the burning of his MSS.—Referred to in the Letters of Huygens and Leibnitz—Made public by M. Biot—Mentioned in the Diary of Mr. De la Pryme—The story referred to disproved—Newton’s Papers burnt before 1684—Newton’s Letter to Mr. Pepys—Letter of Mr. Pepys to Mr. Millington—Mr. Millington’s reply—Mr. Pepys’ second Letter to Mr. Millington—Newton solves a Problem in Chances—His Letter to Locke—Reply of Locke—Newton’s Answer, explaining the cause of his Illness—His Critical Letter to Dr. Mill—His Mind never in a state of derangement, but fitted for the highest intellectual efforts,	123–156
